

JAMES ZENG

Software Engineer

San Leandro, San Francisco Bay Area, CA | (510) 207-6649 | portfolio-website-jamzeng24.vercel.app
jamzeng24@gmail.com

A Software Engineer and all-around technology enthusiast with the motivation and adaptability who is on a path to get back in industry. To seek a full-time position that offers challenges which employ my interpersonal and problem-solving skills. To equally seek a company which fosters an environment of growth and excellence to complement my passion to be successful.

Work Experience

Computer Science Tutor

Self-Employed, Castro Valley, CA | November 2021 – Present

- Find potential students through messaging applications and met at a local coffee shop to discuss their software engineering goals and learning.
- Review material with coding boot camp students to ensure proper learning of topics, such as data structures, languages & paradigms, recursion & dynamic programming, and algorithms & time complexity.
- Develop methods to accommodate students through assessing their learning needs and weakness areas by communicating how I understand certain concepts and how it relates to technologies in practice.

Lead Quality Assurance Specialist

SJLY, Inc., San Leandro, CA | August 2019 – Present

- Inspect, verify, and document characteristics of individual T4 Tea for U franchisees by comparing their product against company standards.
- Coordinate a small team of 3 to help me maintain over 40 stores in California by teaching them how to properly create the product, build a healthy storefront, and maintain good business practices.
- Establish and maintain connections between owners to guarantee individual branches agree on how each store should present itself.
- Able to maintain storefronts including day-to-day operations, employee hiring and satisfaction, and identify areas of improvement.

Projects

Fusion Delight, a restaurant website

- Built and designed a static website using Gatsby (React) for a local restaurant in San Leandro.
- Worked with SEO-friendly frameworks to make sure their website gets exposure on search engines.
- Aimed to deliver content using Gatsby optimization and i18next to make sure there is no unnecessary latency and a clean directory structure for a potential revisit to the codebase for other developers.

Speak Easy, a public speaking web application

- Worked in a group of 10 other engineers to create a web application which allows users to host public speaking sessions online and have other users view and leave feedback about their performance.
- Focused on creating RESTful API in Express JS with Node JS and Google Firebase for front-end to manage accounts, sessions, and feedback.
- Participated in an agile development environment including weekly SCRUM and code review with active documentation on use cases, user stories, and API endpoints.

Education

- University of California, San Diego | La Jolla, CA
Computer Science B.S.
Sept. 2016 - July 2019

Relevant Coursework

- Advanced Data Structures
- Cryptography
- Computer Security
- Database System Principles
- Web Client Languages
- Computer Architecture

Key Skills

- Problem Solving
- Python
- JavaScript (Node, React, Express)
- C++
- Git
- AWS
- Java
- Kotlin
- HTML / CSS
- Ruby (Rails)
- SQL
- Unix

Certifications

- AWS Cloud Practitioner
4/29/2022
- AWS Solutions Architect - Associate
Expected end of May 2022
